The District adopted its 2016 budget and approved a 5.0% rate adjustment on December 23, 2015. The rate adjustment, effective for all billing beginning January 1, 2016, was required to meet the costs incurred for increased operations, power and repair costs, the costs of unfunded government mandated disinfection at various District wastewater treatment plants, and to help fund the debt service payments for the Highway A & North Country Club Road water line upgrades.
